DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Invention IA, claims 1-14, in the reply filed on 11/09/2004 is acknowledged.
2. **Claims 39-65 are withdrawn** from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim between Species I and II. Election was made **without** traverse in the reply filed on 11/09/2004.
3. Claims 1-14 are directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 15-38, directed to the process of making or using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, are now subject to being rejoined. Process claims 15-38 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claims 39-65, not directed to the process of making or using the patentable product, will not be rejoined.

Examiner's Amendment

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

5. This application is in condition for allowance except for the presence of claims 39-65 non-elected without traverse. Accordingly, claims 39-65 have been cancelled.

Allowable Subject Matter

6. Claims 1-38 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious a floating gate memory cell structure, a NOR architecture comprising the floating gate memory cell structure, and a method of forming thereof with all exclusive limitations as recited in claims 1, 4, 7, 13, 14, 15, 24, 26, and 38. Specifically, the prior art of record fails to disclose a floating gate memory cell structure comprising a floating gate memory cell, a select gate, a trench, the floating gate memory cell formed on a sidewall of the trench, the select gate formed on a second sidewall of the trench, and the floating gate memory cell coupled to the select gate by a source/drain region formed at the bottom of the trench.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

a) U.S. Patent 6,762,955 to Sakui et al. discloses a nonvolatile semiconductor memory having control gate with top flat surface covering storage layers of two adjacent transistors.

b) U.S. Patent 6,768,162 to Chang et al. discloses a split gate flash memory cell including a substrate having a trench, a floating gate formed on the substrate, a selective gate formed on a sidewall of the floating gate and on a sidewall of the trench.
